

## 1.) Valandre Immelman (221-81674)

Category: 03. Mountain-climbing equipment

### Articulated down jacket

H-box wall articulated form fitted down jacket, with an active climbing cold weather Sport design direction. Advanced technical and innovative compartment system (inside body section and inside arm compartments constructed in a 9 mono block), allowing no down shift, despite arm and body movements. Articulation offering high insulation + low weight + "light" and free arm movements. Tested to have high altitude performance, on technical difficult routes. Judged to be "heavily needed" in the high altitude climbing community. Total weight: 963g/XL Down load: 340g/XL Number of compartments: 512

## 2.) Vingetorix (221-81702)

Category: 07. Products of high ecological and sustainable value

### Outdoor Jacket

Vingetorix is a City-Jacket with functional outdoor features (breathable, water-repellent and windproof). It offers ideal wearing comfort and protects you from wind and rain. We combine plain design and top quality with sustainability. In order to produce most ecologically we use organic cotton. The whole production process from yarn spinning, weaving, dying and finishing the fabric (EtaProof) up to garment manufacturing is made in Switzerland. Vingetorix is produced under the lowest possible CO2 emission.

#### 4.) Titan 450 (221-81933)

Category: 07. Products of high ecological and sustainable value

##### **Sleeping Bag**

The Titan 450 Light is a groundbreaking bag that combines Mountain Equipment's 50 years of expertise with our new industry first Down Codex Project. A sleeping bag perfect for modern backpackers and mountaineers who appreciate low weight with solid ethics. In conjunction with the IDFL we have carried out a complete audit of our entire down supply chain, from farms to the end product. This includes the sourcing process with no live plucking or harvesting, high standards of animal welfare and solvent free processing. We are the first outdoor company in the world who can truly guarantee our down and its origins. A new standard has arrived.

## **6.) Therm-a-Rest® NeoAir XTherm Mattress (221-82003)**

Category: 04. Camping equipment

### **mattress**

Featuring a cutting-edge combination of technology, design and materials, the NeoAir XTherm mattress offers a 5.7 R-Value at only 430 grams. A patent-pending Reflective Barrier design achieves four-season warmth with multiple layers that reflect heat back to the user's body and reduce convective heat loss to the ground. The patent-pending Triangular Core Matrix design creates internal walls that trap warm air while providing a stable, comfortable sleeping platform. Advanced fabrics and a tapered design offer exceptional compressibility, compactness and light weight. Pump sack and repair kit included. Made in Ireland and Seattle, USA.

## 7.) Spinoza Jacket (221-82177)

Category: 08. Material Innovations

### Spinoza Jacket

Technical mountaineering jacket featuring Dry.Q Elite fabric. Lightweight, waterproof/breathable & air permeable, it's the perfect climbing jacket for changing conditions. 20-denier, three-layer Dry.Q Elite-based fabrication. Core benefits of Dry.Q Elite: air permeability. 100% durably waterproof, it allows body heat and moisture to pass through the shell the instant you put it on. To combine the light weight and durability, we sourced a strong 20D face fabric with a unique weave. This false twist weave increases the surface area of the fabric fibers and so, increases the fabric's ability to transport moisture away from the body.

## 9.) Primus OmniLite Ti (221-82253)

Category: 03. Mountain-climbing equipment

### Lightweight expedition stove

Lightweight (239g), sturdy, reliable, versatile, and fully expedition-suitable! Based on the technology of the legendary, award-winning OmniFuel stove, Primus adapted the OmniLite Ti to the use with fuel-efficient pots with a heat exchanger. In comparison to the old Omnifuel, the new Titanium-made stove consumes less fuel (for the same quantity of boiling water) thanks to smaller nozzles and a reduced heat output. It still burns virtually every kind of fuel: liquid gas, petrol, paraffin/kerosene, aviation fuel and even diesel. New: the upper part of the burner can be unscrewed for easy cleaning or changing the combustion nozzle.

## 10.) Ergo Hammock Combi (221-82256)

Category: 04. Camping equipment

### Hammock

This new, revolutionary backpacking hammock is the first one allowing a perfectly flat sleeping experience in a hammock. Five years of development time went into it. It is all inclusive: Hammock, tarp, mosquito net and smart setup ropes. This makes hammocks an ultralight alternative to a tent. Mat sleeve in double floor provides warmth and stow space. Moskitonet is all around unzippable. 2 inner pockets for book, glasses and water bottle. Rocksolid Dyneema-cord-suspension system with no-hassle-sleeves. The rain/sun tarp is very generously cut and features versatile set-up options.

## 11.) Real Custom Made (221-82264)

Category: 01. Apparel/Helmet/Shoes

### 1st real bespoke trekking boot

HANWAG is the first bootmaker to offer real bespoke trekking boots. From July 2011, the Bavarian company introduces Hanwag Real Custom Made to retailers. Specially trained staff will scan the users feet with a state-of-the art 3D Laser Scanner. The data are transferred to Hanwag who produce individual lasts for every single foot. On these lasts, Hanwag cobbles the bespoke shoes (starting with the top-end trekking boot Alaska GTX®). People with unusually shaped feet or two different sizes left and right can buy perfectly fitting outdoor footwear. SRP approx 780. Euro. Further shoes will cost less no need for scanning or last-making.
