## Segment 6: Seefeld - Fulpmes

The longest segment of the Tirol Mountain Bike Safari crosses Inntal Valley before ascending towards Brenner Pass. From lung-burning 1,200 meter climbs to adrenaline-charged descents, this ride on surfaced and paved roads has it all. Ride the Muttereralmbahn Gondola atop Mutterer Alm with your bike to enjoy amazing views of Inntal Valley, of Tirol's lively capital Innsbruck and of rugged Nordkette Massif. Great climbing, epic descending, what more do you want?

### Tourdescription

Leave Seefeld on small roads that soon turn onto a magnificent mountain bike trail. This trail coasts into Inntal Valley and bypasses Zirler Berg road, which is closed for cyclists. On the southern side of Inntal Valley, it's a long climb on small roads that cut up the hillside in hairpins, finally emerging in Sellrain high above the Inntal Valley. From there, the route follows Fotscher Bach brook to the south. Cross the brook and continue

riding towards Mutters, where you ride the Muttereralmbahn Gondola up to 1,600 meters with your bike. From the top terminal, a long forest road descent will bring you to the entrance of Stubai Valley. The trail loses 600 metres in height over the course of this twisting, fast flowing descent and deposits you at the foot of another climb, gaining another 200 metres of height, on your way to Fulpmes, which is the destination end of this ride.

### Details

- Distance: 63.0 km
- Start: Seefeld
- Finish: Fulpmes
- Number of Lifts: 1
- Highest Elevation: 1,630 m
- Elevation Gain: 1,860 m
- Lift Assisted Elevation Gain: 690 m
- Elevation Gain by Bike: 1,170 m
- Difficulty: Intermediate
